-: ABOUT US :-

Needless to say, Panchal Perforators has always maintained with international standard and norms. After manufacturing, these items are tested on various parameters ensuring its durability and robustness.

Every item is tested for shock, stress, strain, thermal loading, deformation, vibration and noise under different load conditions.

We also customize the material as per the specification of our client. These items are widely demanded due to its durability, strong construction and reliability.

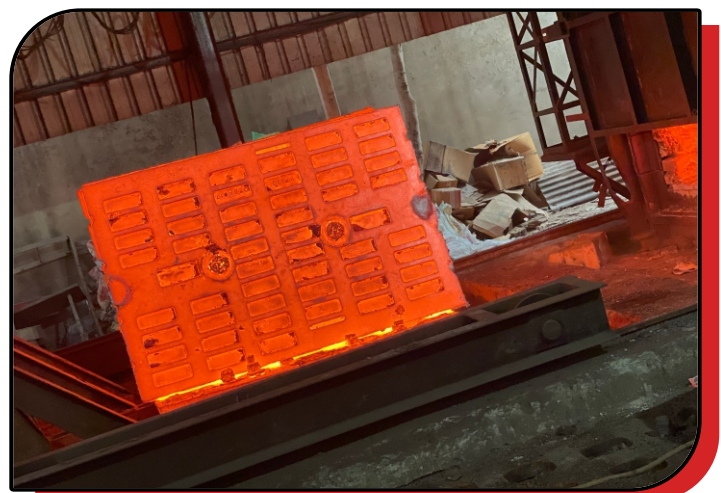

-: OUR PROFILE :-

Panchal Perforators is professional manufacturer Cone Mantle, Jaw Plates, Side Plates, Wiremesh and Perforation was Established in 1986.

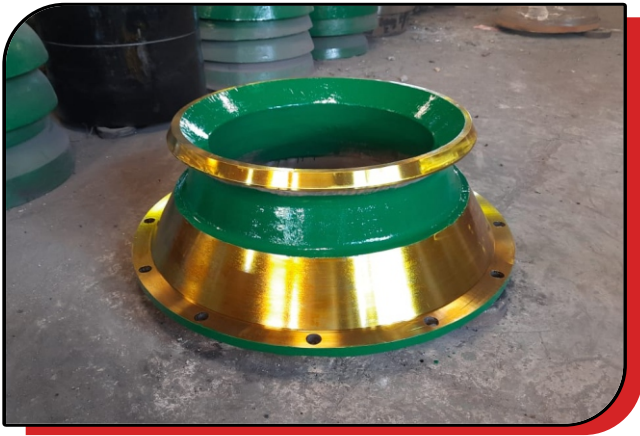

In last few years, we insist on offering high quality and competitive price, best service to our client, our product refer to construction and mining industry.

Main products:- Cone Mantle, Jaw Plates, Side Plates, Wire Mesh, Vibrating Screens, Perforated Mesh and all Spare Parts of Cone Crusher.

All of products were manufactured strictly by the ISO 9001:2008 international quality certification system, implementation of scientific management and gain international certification, the product meet the standard requirement, our product materials, specification, the quality have reached the national standard.

-: HOT PRODUCTS :-

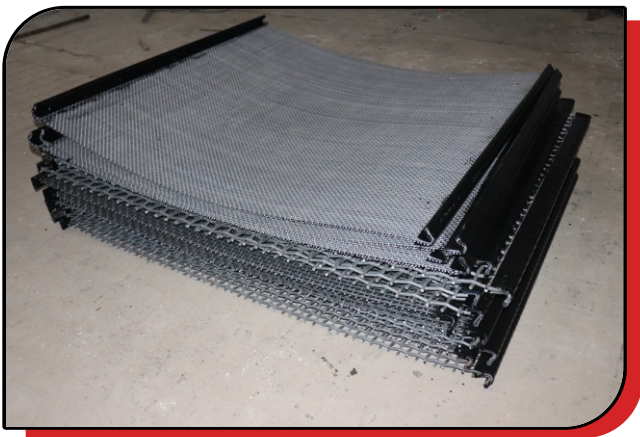

CONCAVE MANTLE

Concave Mantle is one of the primary parts of the equipment. it can be operated the secondary, quaternary and tertiary stage as per the crushing process. since the products are manufactured at our foundries and manufacturing facilities, we have a complete control over the quality of the products manufactured.

JAW PLATES

Panchal Perforators customize the jaw plates as per the specifications of our clients. these plates are widely demanded due to its durability, strong construction and reliability. We has always maintained with international standards and norms. After manufacturing these plates are tested on various parameters ensuring its durability. Every model of plates is tested for shock, stress, strain, thermal loading, deformation, vibration and noise under different load conditions.

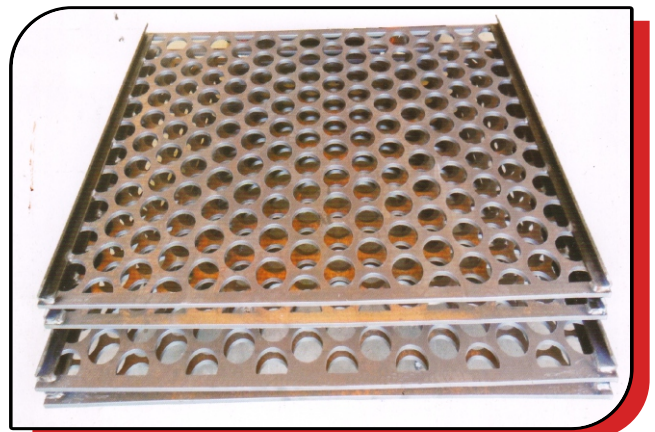

WIREMESH SCREENS

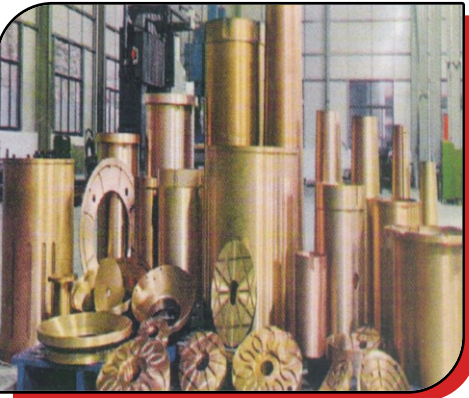

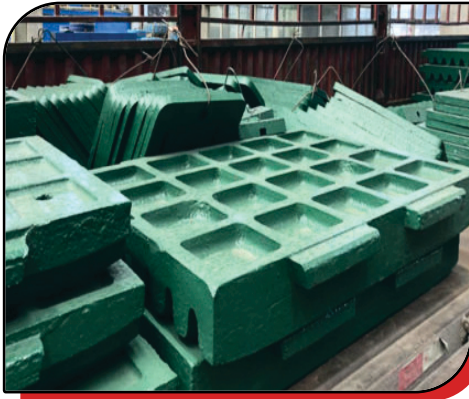

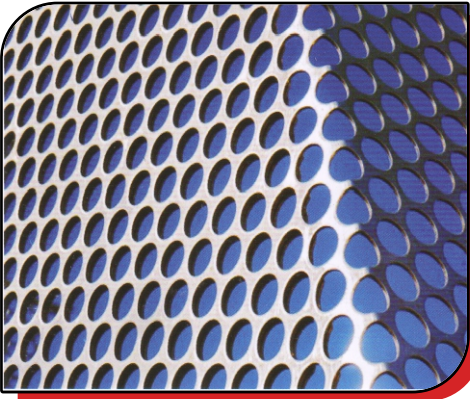

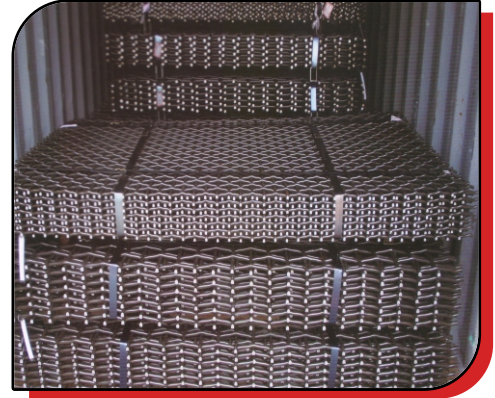

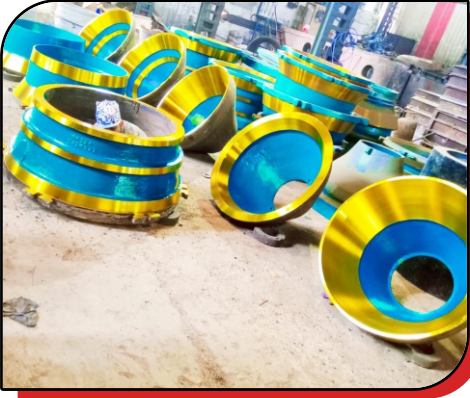

In this type of mesh, the wires are stamped on the opposite side of one of its surfaces, obtaining from the weaving a flat and even surface on the opposite side of the undulations. the structure is very solid and this allows it to receive heavy loads. the main characteristic of this type of product is its flat working surface, which gives it long service time and a maximum performance.

PERFORATED SHEETS

For Very Heavy Loads individually manufactured according to specifications sketches or drawing.
